

XM Radio is the best innovation in radio in a generation. The choices and services it offers are far better than anything on conventional commercial radio. Instead of offering the same-old, copycat, all-look-alike radio formats that are currently on the homogenized commercial radio, XM has innovated excellent formats which provide radio listeners with great, previously unoffered choices.

I love the wide variety of choices from BBC to Lucy, XM Cafe, Bluegrass Junction, Caliente, etc. Until XM Radio came along there were none of these choices on the airwaves out here in West Virginia. Thank you, XM, for having the initiative to bring such great radio to the heart of Appalachia. None of the existing commercial radio stations have improved at all during the same period of time!

If commercial radio and their lobbyists feel threatened, then they need to offer a better service... like XM Radio.

Listening to XM in West Virginia and loving it,
Dr. Ryan McCarthy
